Technology Plan Submission Form

Name & Address of School District: Canajoharie Central Schools

136 Scholastic Way

Canajoharie NY 13317

Contact Name: Deborah P. Grimshaw Contact Phone No.: 518-673-6302

Contact Email: deborah.grimshaw@canjo.org Contact Fax No:

Date Created: 2/2012 – 5/2012 Date Submitted: 6/1/12 Timeline of Plan: 2012-2015

Please state the page(s) that your district's Technology Plan addresses the four following core elements.

<u>Page(s)</u>	<u>4 Core Elements</u>
3-4	1) Mission & Goals Statement
4-5	2) Staff Development Plan
Attachment A	3) Current Inventory
5	4) Evaluation Process

Mail 1 copy of your Technology Plan to:

Elaine Hopper, Managing Coordinator
Capital Region BOCES NERIC
1031 Watervliet-Shaker Rd.
Albany, NY 12205

Or email to ehopper@gw.neric.org (as a pdf if possible)

CANAJOHARIE CENTRAL SCHOOLS INSTRUCTIONAL TECHNOLOGY PLAN 2102-2015

MISSION STATEMENT

Background

Technology use in instruction at Canajoharie is focused on supporting student learning connected to the to Common Core State Standards and to meeting Canajoharie's Race to the Top benchmarks. Technology is a powerful instructional tool that, when used strategically, helps all students grow into productive adults. The purpose of this plan is to outline the goals and strategies for instructional technology in the next three years.

District Mission

The mission of the Canajoharie Central School District is:

Our goal is for all Canajoharie students to graduate with the knowledge, practice, and habits of lifelong, self-directed learners....

- who set and achieve challenging goals, enjoy learning and sharing their learning, and know how to solve learning and real-life problems with a wide range of academic, practical, communication, and personal skills
- who respect themselves and others, can follow as well as lead, and understand their civic rights and responsibilities at every level of society
- who are prepared to be competent and reliable members of the future workforce: experienced, capable, adaptable to the demands of change.

Technology Vision

The world of our students is a world that we cannot envision. Their jobs not yet been created. The pace of learning and change in their world requires that their learning environment and access to materials be flexible and mobile. Every physical location in the school should have the capability to be a connected learning environment for students to do individual or collaborative work.

PROGRAM EVALUATION AND ASSESSMENT

Inventory Lists

The Inventory lists for the district are attached (Attachment A).

Evaluation Data

A district wide Technology Plan Work Group was convened in early 2012. The purpose of the Work Group was to evaluate the objectives set forth in the previous plan, and to develop the set of goals and objectives for the 2012-2015 plan. The results of the analysis of the expiring plan were used to drive the vision and goals for this plan. Our findings suggested that many of the objectives were met, however they may not have been met consistently across the district or with regular follow through. An additional finding was the lack of coordination across the district in technology application and use. This is an area the Work Group determined needs to be addressed. The Work Group also analyzed the current use of technology hardware and software in relation to use, applicability and support of student learning. The enclosed budget reflects hardware/software needs to support student learning.

Direct Tie to Planned Purchases

Evaluation of hardware and software use provides valuable data to determine future needs and acquisitions. Requests for instructional software are determined through the budgetary request process. Requests by individual teachers, grade levels, or buildings are honored up to the annual budget amount. Requests for software are examined by the technology staff to ensure compatibility with existing technologies. The district's technology staff works collaboratively with the administrative staff to ensure that software requests have a justification that impacts student outcomes consistent with district initiatives.

TECHNOLOGY GOALS 2012 – 2015

- By the end of the 2015 school year:
 - All district buildings will have seamless, reliable and fully functional wireless capability. Success indicator: capability exists to watch an Internet video clip while walking from one end of the building to the other.
 - Year 1:
 - Purchase and installation of wireless access controller
 - Identification / prioritization of access point locations
 - Year 2: Purchase and installation of first tier priority access points
 - Year 3: Purchase and installation of second tier priority access points
 - Each teacher will have an interactive white board and tablet or iPad to use for instructional purposes. Success indicators: 100% of teachers have assigned white boards and tablet or iPads.
 - Year 1: 50% of all staff (85 teachers) will be assigned and trained on white board/tablet/iPad use
 - Year 2: Remaining 50% of staff will be assigned and trained on white board/tablet/iPad use
 - and trained on white board/tablet/iPad use
 - Year 3: Teachers will participate in advanced training courses
 - Learning stations will exist in each building where teachers and students can collaborate, link and sync up with the teacher providing direct instruction, or monitoring independent work. Success indicator: Physical spaces are created in each building. Collected data on usage by teachers/students
 - Year 1: The District Technology Committee will evaluate current technology learning spaces and develop a plan for re-configuration of one space at each physical building location to create a learning commons space
 - Year 2: One learning commons space will be established at the high school
 - Year 3: One learning commons space will be established at the middle and elementary schools respectively
 - K-12 student benchmarks in computer hardware and software skills will be embedded into common core curriculum instruction. Success indicator: Content area curriculum documents include identified technology benchmarks. Technology use is present in observed teacher lessons.

- Year 1: The District Technology Committee will learn about technology standards and indicators and develop a plan for embedding the skills into instruction. This activity will be coordinated with a larger district initiative of curriculum articulation
- Year 2: The District Technology Committee, in consultation with their grade level or department teams will identify end of grade level benchmarks and terminal benchmarks at end of grades 5, 8 and 12.
- Year 3: 3 representative work groups will establish and embed performance indicators into content curriculum

PROFESSIONAL DEVELOPMENT

It is an explicit expectation that our staff will use instructional technology as a teaching/learning tool. To make that expectation a reality for all students; differentiated professional development will be implemented. Professional development will occur in whole group, small group, individual job embedded training and teacher peer instruction. Our general position is to build capacity in our staff by developing teacher turnkey trainers. In June of 2012, the district trained 15 teachers in SMART board operations and use, with the expectation that these teachers will work with their colleagues. Additional examples of areas for training include: iPad operation and applications, tablet PC functionality, updated software applications (we are going to an updated version of Microsoft office products).

The District Technology Committee and the Professional Development team will manage professional development activities jointly. Management will include identification of professional development needs, scheduling, resource allocation and connection to overall professional development activities.

EVALUATION/ASSESSMENT

The 2012-2015 Canajoharie District Technology Plan represents an important segment of the district's learning environment. This plan is our best estimate of action and activities and is subject to revision dependent on internal and external factors.

The goals and objectives of this plan will be reviewed and adjusted three times a year by the District Technology Committee. The District Technology Committee is a broad based representative group whose function is to advocate and communicate for the use of technology in student learning. The District Technology Committee will review progress and establish or revise priorities in the accomplishment of the goals of this plan.

Evaluating the plan goals and objectives will also include recommendations from the district's Professional Development Team, Inquiry Teams, Administrative Team and the Board of Education.
